If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: _____

Inventors (please provide full names): _____

Earliest Priority Filing Date: _____

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

Conference Date: 10-13 Nov. 1999 Conference Location: San Juan, Puerto Rico

Language: English Document Type: Conference Paper (PA)

Treatment: General, Review (G)

Abstract: Peer revision workshops are a common feature in most composition classes; however, too often students complain that they gain little from having their peers read their writing. They feel that their peers know as little as they do, and although practice shows that peer **reviewers** are able to **identify** problematic areas in a **paper**, student-writers are often unwilling to listen to the advice of their peers. Similarly, some teachers have unrealistic expectations for peer **review** sessions, some give extensive peer **review** sheets that take vast amounts of time to complete, and some offer their students little in the way of advice as to how to comment on another student's **paper**. The result can be frustrating for all involved. However, by carefully constructing peer **review** sheets that match the assignment sheet, grading criteria for the assignment, and the goals for the course, instructors can create effective peer **review** sessions from which student writers benefit. In this **paper**, the authors present a guided peer revision tool that can be adapted for any assignment which enables student writers to act as effective peer **reviewers**. (26 Refs)

Treatment: Practical (P)

Abstract: This **paper** proposes a research agenda and tool development methodology to support software code inspections. Research suggests promise and opportunity for a practical, people-oriented, and cognitively-based code inspection research approach. To provide theoretical and practical foundations, this **paper** identifies research assumptions, pitfalls and potentials. It also proposes a theoretical causal model. Finally, the **paper** presents and analyzes results from a pilot study. Research contributions include: linking tasks, technology, and levels of maturity (using a slightly modified capability maturity model); and positing that, given process maturity and **reviewer** proficiency profiles, management can better allocate resources (program coders and **reviewers** matched by motivation, code **selection**, supporting documentation, and **review** tools/processes). Treatment: Practical (P)

Abstract: This **paper** summarizes an empirical study of performance by, and reactions of, programmers using expert critiquing systems during a programming task. The study tests hypotheses about the value of various strategies for critic timing, agency, dialogue, and strategy. Performance statistics and reactions were collected from 39 competent programmers participating in the trials. Among other findings, results indicate that textual explanations and repair suggestions speed up programming time 3.5-fold relative to non-textual debuggers. However, a tenth of the subjects **refuse** to use the **critics**, and another fifth of the subjects indicate they do not like to read the textual suggestions. These and other lessons learned are **reviewed**. (13 Refs)

Abstract: It is widely accepted that software development technical **reviews** (SDTRs) are a useful technique for finding defects in software products. The normative SDTR literature assumes that group **reviews** are better than individual **reviews**. Recent debates centre around the need for **review** meetings. This **paper** presents the findings of a replicated experiment that was conducted to investigate whether group **review** meetings are needed and why. We found that an interacting group is the preferred choice over the average individual and artificial (nominal) groups. The source of performance advantage of interacting groups is not synergy as was previously thought, but rather in discriminating between true defects and false positives **identified** by individual **reviewers**. As a practical implication, nominal groups may be an alternative **review** design in situations where individuals exhibit a low level of false positives. (31 Refs)

Treatment: Practical (P); Theoretical (T)

Abstract: This **paper** **examines** the performance of an HDP-type adaptive critic design (ACD) of the game Go. The game Go is an ideal problem domain for exploring machine learning; it has simple rules but requires complex strategies to play well. All current commercial Go programs are knowledge based implementations; they utilize input feature and pattern matching along with minimax type search techniques. But the extremely high branching factor puts a limit on their capabilities, and they are very weak compared to the relative strengths of other game programs like chess. In this **paper**

.. the Go-playing ACD consists of a critic network and an action network. The HDP type critic network learns to predict the cumulative utility function of the current board position from training games, and, the action network **chooses** a next move which maximizes **critics** next step cost-to-go. After about 6000 different training games against a public domain program, WALLY, the network (playing WHITE) began to win in some of the games and showed slow but steady improvements on test games. Treatment: General, Review (G)

Abstract: Powell feels that Dr. Nishikawa apparently misunderstood section E "Data analysis and tumor classification" on p. 1341 of the author's **paper**. There the author stated "the ultimate goal of a lesion classification algorithm is to produce a high specificity AT A VERY LOW FALSE NEGATIVE RATE (FNR)." FNR is just 1.0-sensitivity. Furthermore, on that same page the author stated that "we **evaluated** the specifications at FNRs of 0.0 to 0.10. This was performed by estimating the partial area under the ROC curve according to the method described by McClish." In other words, the author performed the exact analysis that Dr. Nishikawa is recommending. The author even used the identical range of sensitivities, i.e., 90% to 100% (or, FNR of 0.0 to 0.10). Although in Fig. 8 the OBSERVED specificity of **Reviewer 1** at FNRs of 0.0 to 0.10 is higher than for TBR, there is no statistically significant difference between the two clinical **reviewers** and the TBR measurement. The author stated this on p. 1344 of the **paper**, along with the relevant y-values: 0.412 and 0.873. With regards to Dr. Nishikawa's second comment, "that it is often not meaningful to compare results from two different tests when the tests are applied to two different datasets," the author agrees that this is true if there is a difference in the severity of the disease observed between the two datasets. However, the author did make a comparison of the technique used to Giger's technique using the author's dataset and the comparison with Ackerman and Gose's results was made at the **request** of one of the **Reviewers**. Treatment: Theoretical (T)

Abstract: An adaptive critic learning (ACL) structure consists of two modules: the action and the critic ones. Learning occurs in both modules. The critic module learns to **evaluate** the system status. It transforms occasionally occurred failure signals into useful **evaluation** information. Utilizing such information, the action module can learn the control technique. In this **paper**, the authors investigate the technique of using basis functions (BFs) in ACL. One difficulty in the scheme is on selection of learning parameters. Without a guideline, the best set of learning parameters must be obtained from a large number of test simulations. This study investigated the effects of parameters through analysis and verified the analytical results by simulations. In addition to the problem of parameter selection, effects of measurement errors on the CMAC-based (one basis function technique) ACL have been also **examined** and reported. (9 Refs)

Treatment: Practical (P)

Abstract: Keeping track of **manuscripts** and **reviewers** in editorial offices can be a complex and time-consuming task, especially for offices that handle thousands of **manuscripts** annually. The American Chemical Society (ACS) has developed a computer-based system, called **Peer Review Plus**, which is used by editorial staff for tracking **manuscripts**, **assigning reviewers**, and generating statistical reports. The current software is a second generation system that required approximately 4 man-years to develop. The software centers around **reviewer** and **author/manuscript** files with a capacity of approximately 25000 **author and reviewer** records providing rapid record access via several file keys. The system permits office staff to quickly **select** appropriate **reviewers** for **manuscripts** in specific subdisciplines, check the status of **manuscripts**, identify overdue **reviews**, list **manuscripts** for a particular author, list **manuscript** processing time, identify lack-of-action bottlenecks for **manuscripts**, etc. Word-processing functions have been integrated with the **Peer Review Plus** software, and automated telecommunication facilities have been developed to permit unattended transfer of data in a networked environment. (9 Refs)

Abstract: The Editorial Processing Center (EPC) concept will serve to reverse the trend of spiraling costs in scientific editing and publication by the intelligent application of computer technology. The key elements of the concept are: the capturing of the **manuscripts** in a machine readable form from the author, an online text editing capability, automatic hyphenation, justification and pagination, the remote job entry concept which gives the EPC control over the operation without the necessity for a large computer on-site, the computer assistance in the **selection** of **reviewers**, computer aided redaction, and a computer based **manuscript** tracking system. Song composer and critic : A comparative study of selected songs by Robert Schumann and by composers he reviewed in the "Neue Zeitschrift fuer Musik" (Norbert Burgmueller, Carl Loewe, Franz Lachner, Carl Gottlieb Reissiger, Germany)

Author: Gross, David Michael

Degree: D.M.A.

Year: 2001

Corporate Source/Institution: University of Illinois at Urbana-Champaign (0090)

Adviser: John Hill

Source: VOLUME 62/06-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 1977. 158 PAGES

Descriptors: MUSIC

Descriptor Codes: 0413

ISBN: 0-493-27398-0

After having composed almost exclusively for piano solo during the first ten years of his career, Robert Schumann wrote well over one hundred songs in 1840. Even though this shift of artistic focus occurred suddenly, it is preceded by thorough knowledge of the compositional style of his colleagues. In his role as chief editor of the *Neue Zeitschrift fuer Musik*, Schumann became acquainted with hundreds of songs, many of which were **reviewed** in the *NZfM*, either by Schumann himself or by other contributors.

This **paper** presents a two-fold comparison. In a first step, selected songs, written in the 1830s by Norbert Burgmueller, Carl Loewe, Franz Lachner, and Carl Gottlieb Reissiger, are compared to Schumann's settings, composed in 1840, of the same poems. The analysis is based on a reading of

the poetry and **examines** the various levels on which the composer's interpretation of the poem is projected by the music. In some cases, the comparison suggests that Schumann emulated features found in the earlier composers' songs. However, these common features typically are found in melodic and rhythmic materials, while the main difference lies in the greater care and artistic license with which Schumann reads, **evaluates**, and represents the poem.

In a second step, **reviews** of works by Burgmüller, Loewe, Lachner, and Reissiger are **examined** to establish whether the described strengths and weaknesses coincide with the results of step 1, and whether conclusions can be drawn regarding Schumann's compositional process. In spite of the fact that Schumann expresses both positive and negative criticism unmistakably clearly, he refrains from alluding to his artistic preferences and does not hesitate to praise songs whose style differs from his own, as long as they do not offend the goals of the *Davidson*. The use of the *NZfM* as a source to illuminate Schumann's compositional process is thereby rendered dubious.

This study illustrates in detail that Schumann's outstanding position as song composer is based on his unique sensitivity to poetry—a characteristic that distinguishes him from his contemporaries.

Source: VOLUME 37/04 of MASTERS ABSTRACTS.

PAGE 1058. 47 PAGES

Descriptors: ART HISTORY ; FINE ARTS ; CINEMA

Descriptor Codes: 0377; 0357; 0900

This thesis endeavors to look chronologically and critically at certain art practices that rely heavily on photography. As such, it does not juxtapose painting against photography for formal and stylistic comparison, nor does it attempt to trace specific links between the visual arts and photography. Shifts in art practices and criticism resulted in new bodies of art work and a new thread of criticism; these approaches and shifts in art work and criticism will be explored. The current inquiry involves both critics and artists, the artists often utilizing images from film and/or popular culture. This **examination** of art practices using photographic technologies begins in the late 1960s, when the distinctions between high art and mass culture, fine art and kitsch became blurred.

This thesis will **examine** a **selection** of **critics**, theorists and artists who discuss photographic technologies and/or processes. This **paper** will also show how photography facilitated the collapse of barriers between high art and mass culture, art and kitsch, fine art and photography, and when photography witnessed a renewed interest.

Source: VOLUME 59/03-A OF DISSERTATION ABSTRACTS INTERNATIONAL.
PAGE 833. 159 PAGES
Descriptors: LITERATURE, ENGLISH ; FOLKLORE ; MUSIC
Descriptor Codes: 0593; 0358; 0413

The ballads **examined** here are from F. J. Child's The English and Scottish Popular Ballads, the authoritative collection of ballads. Though definitions of the ballad vary, most agree that the ballad is an orally transmitted folksong that tells a story. The Child ballad collection has stood a solitary monument from its publication (1882-1894). In it Child brought together from **manuscripts** and printed sources all of the extant English and Scottish ballads that he regarded as authentic. Though Child's work itself was groundbreaking, exploring territory marginal to the sort of academic study making up his official duties as professor of English at Harvard, his collection soon became canonical, subjected to critical study as a sub-genre. Perhaps because Child himself died before he could write his essay on what the ballads were and what they meant, since Child's death, much of the critical work has been an attempt to fill in what was left undone by Child, that is, defining the ballad and analyzing the criteria by which Child made his choices. In more recent times, critical studies of Child's works have applied psychoanalytic and feminist critiques to selected ballads. Yet, no previous work has **examined** the relationship of Child himself to his collection. This work sets out to view the Child collection in terms of literary critical theory, showing that Child's collecting is an act of Lacanian paternity whereby the collector, attracted especially by the bodies of the female characters, is moved to bring all the ballads under his dominion yet is subverted in his desire for dominion as female characters present themselves in terms of "bodytalk." Chapter one shows Child's collecting as Lacanian paternity. Chapter two focuses on the presentation of women's bodies in the ballads, The final chapter shows that the women characters in **selected** ballads speak according to what **critic** Jane Burns terms "bodytalk."

The 'Neue Freie Presse' and the 'Frankfurter Zeitung' are regarded as respectable and liberal cosmopolitan **papers**. Both these newspapers have extensive feature pages on 'Personalities'. As a 'forum', 'meeting place' and 'platform', these features are reminiscent of the old literary salons.

It is particularly noticeable how both newspapers are keen to combine the qualities of 'intellect', 'conversation' and 'sociability'. The readers' response is, however, not nearly as strong as both **papers** claim. The reactions to the thousands of literary **reviews** take the form of less

than two dozen readers' comments; the propagated revival of publicizing literature remains a mere illusion. The feature pages nevertheless consider themselves to be an 'authority' and 'leader'. Despite their differing 'Weltanschauung', **reviewers** such as Felix Salten, Kasimir Edschmid and Siegfried Kracauer are clearly experts--they leave no doubt about this. The work of a literary critic is justified by a specific need, i.e., the need for literature to be discussed (and **selected**). This provides the **reviewer** with a task. He **selects** the works and gives them meaning; he presents the 'essence'--which the reader finds in a 'representative' newspaper, enabling him to 'join in the conversation'. Complete bibliographies of the literary articles, literary criticism and serialized novels and prose fiction are attached to the thesis.

Descriptor Codes: 0340; 0350; 0567; 0714

Since the journal peer **review** process is an important element in scientific methodology, without which there would be no "science," an **evaluation** and understanding of its reliability and validity are essential. Most editors of biomedical journals, particularly in the United States, faithfully depend on the system of peer **review** to screen out poorly conceived, poorly executed and unoriginal **manuscripts**.

This study was designed to assess the reliability and consistency of **reviewers**' responses, to 10 **selected** questions, from **manuscripts** submitted for publication in the Oral and Maxillofacial Radiology Section, ORAL SURGERY ORAL MEDICINE ORAL PATHOLOGY. Additionally, the validity of "accepted" or "rejected" **manuscripts** was tested.

The data showed that **reviewers** were consistently reliable in their responses to 3 of the 10 selected questions: originality, scientific merit, and final **evaluation**. Also, there was a moderately high degree of validity of resubmitted **manuscripts**. Upon resubmission of 10 previously accepted **manuscripts**, 8 would have been accepted and resubmission of 10 previously rejected **manuscripts** would have resulted in 6 being **rejected**. **Reviewers**' responses, for scientific **manuscripts** only, were no more reliable or consistent than for all categories of **manuscripts** combined. The use of 2 randomly **selected reviewers** validated the fate of "accepted" **manuscripts**, when compared to the use of 3 **reviewers**. However, the use of 2 **reviewers** was not validated for "rejected" **manuscripts**.

The purpose of the present investigation was to study the peer review process in the Journal of Clinical Neuropsychology/Journal of Clinical and Experimental Neuropsychology (JCN/JCEN). Interrater reliability between two independent reviewers regarding the decision of whether or not a manuscript should be published was analyzed, as well as the rates of agreement between the reviewer's recommendations and the final editorial decision. Reviewer reliability on the recommendation for publication fell within the low range for acceptable intraclass correlation coefficient values. Reviewers agreed more often on the recommendation to reject a manuscript than on the decision to accept a manuscript. The editors were equally likely to accept a manuscript that both reviewers agreed should be accepted as they were to reject a manuscript that both reviewers agreed should be rejected. The variables that served as the best predictors of subsequent publication were overall significance, conclusions, methodology, and data analysis. (Abstract shortened by UMI.)

"ALICE'S ADVENTURES IN WONDERLAND" AND "THROUGH THE LOOKING-GLASS": A MENIPPEAN ASSESSMENT AND RHETORICAL ANALYSIS OF CARROLL'S ALICE BOOKS
Author: CHADWICK-JOSHUA, JOCELYN
Degree: PH.D.
Year: 1987
Corporate Source/Institution: TEXAS WOMAN'S UNIVERSITY (0925)
MAJOR PROFESSOR: J. DEAN BISHOP
Source: VOLUME 49/06-A OF DISSERTATION ABSTRACTS INTERNATIONAL.
PAGE 1461. 190 PAGES
Descriptors: LITERATURE, ENGLISH
Descriptor Codes: 0593

Since Lewis Carroll published Alice in Wonderland in 1865 and Through the Looking-Glass in 1872, critics, psychologists, philosophers, and the general audience have sought to isolate and categorize his stylistic form. Called by a critic in 1865 "loose-ended, inconsistent dream stories" that were "stiff and overwrought" (844) and by Hilaire Belloc in 1898 "skin-deep narratives" (310), the two Alice books have defied proper identification and, consequently, appreciation. Although contemporary critics such as Van Wyck Brooks and Northrop Frye have recognized the books' unusual qualities, qualities that transcend children's literature, no one has yet carefully identified the literary expertise underlying the texts. Amid the myriad of analyses that exist, however, that Carroll employs a classical satiric format has eluded many. When one reads these books as Menippean satires rather than as Juvenalian or Horatian and rather than child's simple nonsense, then, a deep-textured purpose and expertise and control evince themselves slowly, consciously, methodically.

This paper examines in Chapter One many of the prevalent analyses of Carroll's narratives. Representative criticisms ranging from the Alice books as children's literature exclusively to works revealing aspects of Carroll's inner personality are reviewed and assessed.

Chapter Two defines Menippean satire from its earliest origins with Menippus, Varro, and Apulieus. The chapter also includes other contributors such as Rabelais and Swift and delineates what each writer contributes to the genre. The chapter finally proposes that Carroll's works yield themselves to coherent and cohesive comprehension and to deep-structured

analysis only when viewed from a Menippean perspective.

Chapters Three and Four provide Menippean analyses rhetorically. Such an approach enables the reader to understand clearly the Menippean intent, motivation, and philosophical stance the two books contain.

Chapter Five, finally, provides an overall summative reiteration of the thesis and arguments. This chapter also asserts that some technical aspects previously critiqued as weaknesses are in actuality strengths when viewed in the proper context.

PAGE 2743. 347 PAGES

Descriptors: SOCIOLOGY, GENERAL

Descriptor Codes: 0626

Manuscripts and **reviews** submitted to the American Sociological **Review** between 1977 and 1982 and professional-biographical characteristics of authors, editors and **reviewers** were **examined** to **identify** and describe factors influencing the decision to publish or reject **manuscripts**. Following a **review** of the relevant literature in the sociology, history and philosophy of science, five research questions were formulated to frame the **examination** and description.

First, what is the extent of consensus among **reviewers** to accept or **reject** **manuscripts**? Second, what criteria do **reviewers** cite to justify their recommendations for the disposition of **manuscripts**? Third, what is the relationship between **reviewers**' recommendations and their justifications? Fourth, do **reviewers**' recommendations and justifications vary by the sub-disciplinary area in which the **manuscripts** are concerned, and by the methods of data collection and analysis employed in the **manuscripts**? Finally, what is the association between **manuscript** characteristics, author - **reviewer** - editor biographical characteristics, **reviewers**' recommendations, and, the editor's final disposition of the **manuscript**?

Complete agreement among **reviewers** is rare. However, when **reviewers** do agree it is most likely to **reject** the **manuscript**. The criteria **reviewers** cite to justify disposition recommendations are most often negative rather than positive comments. Criticisms of the method of analysis and theory are the most frequently specific criticisms. **Reviewers** were equally critical of **manuscripts** that were rejected and those that were eventually published. However, eventually published **manuscripts** received more positive comments from **reviewers** than did their **rejected** counterparts. There were no systematic differences between sub-disciplinary areas, but the criteria cited by **reviewers** and their disposition recommendations did differ according to the method of data collection and analysis. A two stage path model predicts approximately 71% of the variance for the final editorial disposition of the **manuscript**. This model indicates that the editor's decision is heavily influenced by the recommendations of the **reviewers**. Characteristics of the **manuscript** and editorial process variables were better predictors of **reviewers**' recommendation and editor's final disposition than were the professional biographical characteristics of **reviewers** or authors.

J. P. JACOBSEN: DARWINISM AND EROS (DENMARK)

Author: GRANGER, JANIS ELLEN

Degree: PH.D.

Year: 1982

Corporate Source/Institution: UNIVERSITY OF CALIFORNIA, BERKELEY (0028)

Source: VOLUME 43/08-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 2687. 226 PAGES

Descriptors: LITERATURE, GERMANIC

Descriptor Codes: 0311

The purpose of this study is to present a Darwinian interpretation of Jens Peter Jacobsen's (1847-1885) short story "Mogens" and his novel Fru Marie Grubbe. However, because this interpretation conflicts with prevailing critical notions, I have had to devote considerable space to a presentation and discussion of Jacobsen's view of Darwinism as reflected in his popular scientific articles.

I believe Darwinism had a great impact on Jacobsen's authorship. Poems and literary sketches written before his acquaintance with Darwin were modeled after such literary giants as Hans Christian Andersen and Kierkegaard. However, in later sketches, "Udl ndige" (1868) and "Clara" (1870), a definite fascination with instinctive behavior is noticeable and Jacobsen begins to find his own literary philosophy.

The study attempts to demonstrate that "Mogens" and Fru Marie Grubbe stand as primary examples of literary Darwinism.

My analysis begins with an **examination** of some of Jacobsen's literary drafts, diary entries and sketches, as well as a brief treatment of "Mogens" and Fru Marie Grubbe, giving some attention to the development of his literary attitudes and atheism, his early interest in Eros, Darwin and instructional behavior. Next I study Jacobsen's scientific articles written for Vilhelm Moller's periodical Nyt dansk Maanedsskrift. This chapter is central for my thesis. I demonstrate how Jacobsen formulated his own Darwinian philosophy, how he used Darwin's theories to support his own interests, and what aspects of Darwin's theories interested him most.

In section three of this **paper**, "Mogens" (1872) will be considered as a transitional work between Jacobsen's scientific and literary career, because it marks his literary debut and shows clear lines of influence from Darwin. It is generally accepted that "Mogens" contributed much to the Danish literary scene by answering Georg Brandes' demand for a new literature. Most critics feel the novella demanded attention because of the precise descriptions of nature, yet these same **critics refuse** to see Darwinian influence. . . . CANON AND LITERARY CRITICISM

Author: KLINKENBORG, VERLYN LEE

Degree: PH.D.

Year: 1982

Corporate Source/Institution: PRINCETON UNIVERSITY (0181)

Source: VOLUME 43/05-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 1554. 216 PAGES

Descriptors: LITERATURE, ENGLISH

Descriptor Codes: 0593

The idea of canon has a long history in religion and biblical studies, and some of its meanings have naturally been applied to secular literature. This dissertation **examines**, first, the idea of canon in contemporary biblical studies; second, the idea of canon as it is employed in Matthew Arnold's works, especially in *Literature and Dogma* and *God and the Bible*; and, finally, two contemporary approaches to canon in the criticism of Northrop Frye and Harold Bloom. It also includes as an appendix in a separate volume (and under separate copyright) a work which raised the question of canon and which is itself pre-occupied with canonical values and canonicity: *British Literary Manuscripts : Series I and II* by Verlyn Klinkenborg, Hebert Cahoon, and Charles Ryskamp (New York: Dover Publications, Inc., 1981).

To call a work canonical, in biblical studies, suggests that its text has become fixed, that it is inspired, that it arose within a specific historical period and community, and, above all, that it has become normative for religious practice within the community. Also, a canon, as James Sanders and Brevard Childs have pointed out, manifests both stability and adaptability, and it engenders authoritative interpretation of two sorts: **evaluative** shaping of the text itself and exegesis.

Several of these canonical functions are described in Arnold's *Literature and Dogma* and *God and the Bible*; the uses of canon that appear in his attack on Puritanism also typify his secular literary criticism. There he uses the idea of "dis-engagement," which in his sense is analogous to creating a canon; he also stresses the value of a "canon within a canon." Also, Arnold's emphasis on poetical rank, comparative estimates, and a "high standard" of judgment demonstrates the prevalence of canonical **evaluation** in his work.

Two of his successors, Frye and Bloom, eradicate the possibility of canonical decisions by eliminating the **critic**'s ability to **choose** a text to begin with. Frye does this by effectively canonizing all literature, of whatever quality, while Bloom destroys choice by his insistence on the ability of strong poems to elect their successors. Against these positions, it is argued that preliminary choice is a basic canonical function, that by selecting a work to write about the critic necessarily reflects on the canon, and that the **critic** invariably **chooses** from a universe of canonically inflected texts.

**HISTORIC REALITY AND FICTION IN "VIDA Y SUCESOS DE LA MONJA ALFEREZ."
(SPANISH TEXT)**

Author: VALLBONA, RIMA-GRETCHEN ROTHE

Degree: D.M.L.

Year: 1981

Corporate Source/Institution: MIDDLEBURY COLLEGE (0307)

Source: VOLUME 43/04-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 1161. 456 PAGES

Descriptors: LITERATURE, ROMANCE

Descriptor Codes: 0313

The so called autobiography of Catalina de Erauso, *Vida y sucesos de la Monja Alferez* (Life and Events of the Nun Ensign), has been neglected or **rejected** by scholars and **critics**. Most of them say that in view of the accumulation of extravagant adventures and anachronisms in the story the text is a forgery done by a skillful writer, possibly in the 19th century.

Based on the **manuscript** of *Vida y sucesos de la Monja Alferez*, allegedly written in 1624 and deposited in the Royal Academy of History in Madrid in 1867, and on the first edition of this text by Joaquin Mar(')ia Ferrer in 1829, the author of this dissertation analyzes *Vida y*

sucesos de la Monja Alferez by combining diachronic and synchronic methods of analysis.

The first chapter demonstrates, with official documents, the truth of the historical facts contained in the **manuscript**. The second **reviews** various hypothesis concerning the **manuscript** and Ferrer's edition. The third compares the **manuscript** with the Relaciones of 1625 and 1653 (reworkings of the **manuscript**), and tries to prove that the Relaciones were not written by Catalina de Erauso. The fourth and last chapter studies the story, dividing it into four narrative macrosequences, and attempts to show the coexistence of historical facts and fictitious adventures, truth and imagination, throughout the **manuscript**. Fiction and imagination are enhanced by the feminine protagonist dressed as a man, a literary device of the time. In an appendix, a critical edition of the **manuscript** adds proof to the thesis presented in this dissertation.

The undeniable historical truth, the quality of an authentic autobiographical account together with fictitious narrative sequences full of picaresque, spicy stories, and adventures that belong to the so called novel of incident that characterize this text, lead to the following conclusions:

Vida y sucesos de la Monja Alferez is the final product of a reworking of a basic text (short and condensed) written by Catalina de Erauso in 1624 on her trip back to Spain as stated in the story. This original was deposited in 1625 in the printing house of Bernardino de Guzman as stated in the second edition of the Relaciones. Afterwards someone expanded on the text. This second author who made interpolations in the original **manuscript** is responsible for the anachronisms, mistakes, and fictitious episodes evident in the text that has been studied.

A PORTRAIT OF THE JOURNAL EDITOR IN NURSING IN THE UNITED STATES AND CANADA

Author: BINGER, JANE LOUISE

Degree: ED.D.

Year: 1982

Corporate Source/Institution: STANFORD UNIVERSITY (0212)

Source: VOLUME 43/01-B OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 94. 225 PAGES

Descriptors: HEALTH SCIENCES, NURSING

Descriptor Codes: 0569

This study **examined** the backgrounds of contemporary nursing journal editors, the nature of their work, their journals, and their beliefs about desired backgrounds for performing important editorial functions effectively.

The study used a mailed questionnaire and archival sources to gather information on the population of editors. Editors' journals were those printed in English under a continuous title, published in the United States or Canada, initially distributed prior to December 1, 1979, and listed in one of the four major references to the nursing literature. Respondents totaled 58 for a total response rate of 87 percent.

The majority of editors: (1) Are responsible for planning a journal's content, recruiting and working with **manuscript reviewers** and editorial advisers, initial **manuscript** reading, working with authors, substantive editing, design and layout, and soliciting **manuscripts** along with other activities. In short, if editors, themselves, do not **select manuscripts**, they **choose** the **reviewers** who, in turn, **select manuscripts** for publication. (2) Are generally nurses who enter the editorship experienced in the substantive area of their publication, but novices to journal editing. The majority are nurses who work part time in the editorship and hold another position typically as a college faculty

member or administrator, clinician, or association administrator. Most editors believe prior experience in both the substantive area of a journal and in journal editing are among the desired backgrounds for performing editorial functions effectively. (3) Hold masters or doctoral degrees in contrast to the far majority of practicing nurses who held associate degrees or diplomas. (4) Learn or at least become oriented to journal editing on-the-job rather than through formal training in journalism or through prior work experience in editing. (5) Have not worked their way through the ranks of assistant and associate editor to editor or from **manuscript** reader to editor. (6) Receive little collegial support from their peers in the nursing press--the majority interact in person, over the telephone, or in writing with other editors yearly or less often.

The study concluded with recommendations for cultivating the practice and training of editors and for further research to develop a more specific description of the editor in the nursing journal press.

Geographic Location: United States

Presents a favorable **review** of the QMS 1725E Print System (\$4,999), a network laser printer from QMS Inc., Mobile, AL (800, 334). The printer offers a maximum resolution of 600 dpi and is rated at 17 ppm. The unit **reviewed** included 5MB RAM. The printer can accommodate letter, legal, A4 and executive **paper** sizes. Its standard configuration includes two 500-page trays and an optional 1,500 high-capacity bin give it a good range of input options. The printer does not support PCL 5e, only PCL 5, so maximum resolution using HP PCL is 300 dpi. **Reviewer** had difficulty **selecting** a PCL-based Windows driver to work with the printer and QMS's PostScript drivers don't work properly with Aldus PageMaker 5.0a, but calls

this problem ``more an irritant than a disabling factor.'' The printer has a monthly duty cycle of 75,000 pages. Includes one illustration (p192). (djd)

Computers in Education: Extending the Human Mind. Fourth Annual Summer Computer Conference

Newman, Janice Sonkin

Educational Technology , Feb 1986 , v26 n2 p54-55, 2 Pages

Languages: English

Document Type: Book Review

Geographic Location: United States

A mixed **review** of "Computers in Education: Extending the Human Mind. Fourth Annual Summer Computer Conference" (\$20), sponsored and published by the Center for Advanced Technology in Education and the Continuation Center, University of Oregon. Says that it is a collection of **papers** presented at a conference held in Eugene, OR in August, 1985. **Reviewer** only recommends it "to **selected** users" as it covers a wide range of topics superficially.

Descriptors: BOOK **REVIEW** ; EDUCATION; CONFERENCE; COMPUTERS AND SOCIETY

...SPECIFICATION overall and interdependent timing requirements of those logic blocks.

Previous methods have been developed for **determining** the timing characteristics of a plurality of logic blocks, and to **provide** an indication of timing path delays between the blocks. U.S. Patent 4,263,651 shows a method for analyzing logic blocks arranged in predetermined circuit configurations to **identify critical** timing paths and to **determine** whether the path delays of **such critical** paths are too long **or** too short. This method enables individual logic blocks to be redesigned whenever **critical** paths are **identified** which are either too long or too short, **in** order to **provide** an overall system for reliable operation. Still another method has been described in an article...

...Timing analysis of computer hardware". In this method a black-oriented algorithm is used to **produce** a design which meets a specified clock cycle. Likewise, analytical power/timing techniques have been described in a **paper** entitled "Analytical Power/Timing Optimization Technique for Digital System", presented at the Fourteenth Design Automation Conference on June 20 - 22, 1977, in New Orleans, Louisiana, by A. E. Ruehli, P. K. Wolff, Sr., and G. Goertzel. This **paper** describes a method for logic gate delay assignment which achieves power minimisation of digital logic

REVIEW TYPE: Review

GRADE: A

OmniPage Web 1.0 from Caere converts **paper** documents to attractive Web pages. Its interface is similar to Caere's optical character recognition (OCR) program, OmniPage Professional, and, in fact, OmniPage Web incorporates the OmniPage OCR engine. The six large buttons on OmniPage Web's main toolbar that control the process of converting **paper** documents are the Scan/Load Image button, that loads an existing image file or scans a page, the Zoning button, which selects the type of document that is being set up for OCR, the OCR button, that allows OCR alone or OCR followed by proofing, the Outline utility, which analyzes a document and automatically generate a table of contents, and the button for saving a document to Hypertext Markup Language format. OmniPage Web will support standard HTML and also Dynamic HTML and cascading stylesheets. While OmniPage Web produces impressive results, it has no tools to edit documents before processing them to HTML, and documents cannot be opened from word processors. Still, **reviewers** found OmniPage Web to be the easiest way so far to export hard copy documents to HTML.

Medscape, a Web health care company, has recently launched Medscape General Medicine, the first online-only general medical journal. Medscape General Medicine, known as MedGenMed, is free to consumers registered on the Medscape site. Dr. George Lundberg, the former editor of the Journal of the

American Medical Association, is running MedGenMed. Doctors and medical scientists conduct research and share ideas online but still rely on print publications to validate their work. MedGenMed expedites the peer review research publication process by providing a rapid turnaround of three days to critique articles. However, Dr. Jerome Kassirer, the editor of 'The New England Journal of Medicine,' believes that such a fast-track schedule could jeopardize scientific accuracy, and scientists overall want to get their papers published in certain journals because they are considered prestigious. Lundberg assures that authors and reviewers will adhere to the same rigorous guidelines for the publication of articles that other journals follow and that MedGenMed will, in time, generate such authority and prestige.

A discussion of World Wide Web links and sites that provide access to books highlights the Amazon.com online site selling books, music, and videos; Project Gutenberg; On-Line Books Page; 26keys.com; customsensorsolutions.com; and beckamhouse.com. Some believe that the Internet will replace paper, but today's portable e-book devices are too costly, proprietary, and awkward for anyone except early adopters and sight-impaired people. However, the Internet has significantly altered the ways in which books are purchased, read, written, and marketed. All users should check out Amazon.com, a pioneering site that is one of the best shopping sites on the Web. Users can search for a book according to title, author, or subject; read reviews by professional reviewers and other readers; and order books with a few clicks of the mouse. Amazon.com has a much larger selection of books than any physical bookstore. Project Gutenberg attempts to provide great written works by download at no cost. On-Line Books provides links to over 8000 full-text titles, and allows users to link to books that once were banned. The other sites mentioned were created by authors to promote their writing.

PRODUCT NAMES: Adobe Acrobat Capture (563072)

TITLE: Acrobat Capture: Publishing Pages Without Paper

AUTHOR: Lake, Matthew

SOURCE: PC/Computing, v8 n7 p96(1) Jul 1995

ISSN: 0899-1847

RECORD TYPE: Review

REVIEW TYPE: Review

GRADE: A

Adobe Systems' Adobe Acrobat Capture creates Adobe Acrobat Portable Document Format (PDF)-based documents from clippings or fliers, when the user supplies a gray-scale scanner. The product allows users to distribute electronic versions of printed documents created on the PC, including faxes. Capture provides a scanner interface based on ISIS or TWAIN; optical character recognition (OCR); and a proofing utility called Acrobat **Reviewer**. A flowchart interface manages functions using settings established by the user. Only gray-scale scanning is supported, although color support would be a welcome addition. Acrobat Capture must be classified as a workgroup solution, because it is priced at the high end. It has the potential to greatly reduce the cost of document distribution for users of PDF files.

Document presentation is changing rapidly from a static, **paper**-based medium to a dynamic model. One aviation firm uses Interleaf's publishing system to automate documentation. The project lets **reviewers** utilize Interleaf's WorldView hypertext display software to view documents and annotations on their desktops. SoftQuad's SoftQuad Author/Editor is used in another organization, as a front end authoring tool to a relational database. The system lets creators of documents browse the database for various objects, such as boilerplates, tables, and illustrations. Users can include the objects in documents, and the system will automatically insert the most recent version. Users view the documents with Electronic Book Technologies's DynaText SGML viewer, which allows for easy, non-sequential

Abstract (Basic): US 20020107713 A1

NOVELTY - A requisition for product or service is created. An approver and a **reviewer** is **selected**. The requisition is submitted to the **selected reviewer** for **review** and comment for a set terminating **review** period, so that if the **reviewer** fails to **review** and comment within the period, the **reviewer** is deemed to agree to requisition as presented.

DETAILED DESCRIPTION - The requisition is submitted to the approver for **review** and approval. Then, the requisition is submitted for effectuation upon receipt of approval from the approver. An INDEPENDENT CLAIM is included for product and service procurement management system.

USE - For requisitioning product and services for business practices in organization.

ADVANTAGE - Saves complete record of all transaction involving the requisition for audio and similar purposes. Prevents the requisition from bogging down in the inertial preset in an organization. Avoids difficulties always present when several persons in the organization have to **review** and comment on something. As the records of the requisition person is retained, the avoiding of responsibilities of the person to take timely action is prevented. Eliminates the need for a **paper** based intra-office mail system and waste, inefficiency and expense.

DESCRIPTION OF DRAWING(S) - The figure shows a flowchart illustrating the products/services requisitioning method.

Abstract (Basic): EP 1146462 A1

NOVELTY - The customer concern related to the manufacturing defect in a product is received and one digital image of the product is sent to a **reviewer** who submits the approval or **rejection** for the customer concern by analyzing the image.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for customer concern processing system.

USE - For processing customer concern regarding product manufacturing defect in real-time in e.g. vehicle production and dealer industry.

ADVANTAGE - Handles customer concerns and warranty returns in real-time, thereby improving customer satisfaction. Quality improvement actions can be taken sooner, by obtaining the product defect feedback.

DESCRIPTION OF DRAWING(S) - The figure shows the process flow diagram illustrating customer concern processing method.

Abstract (Basic): US 20020065868 A1

NOVELTY - A query for **determining** the mobile computing devices in a communication range, is broadcast. The **determined** device list is presented to a user on an interface. The user selects one device for data transfer. The data is transferred to the device and confirmation of data transfer is presented to the user.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is included for wireless communication system.

USE - For transmission of data among group of mobile computing devices including computers, personal digital assistants, **electronic** organizer, cellular phones and alphanumeric **papers**.

ADVANTAGE - Allows data transfer between personal information devices, without imposing stringent distance requirements. Permits the efficient private sharing of data with several users, without non-selected user within communication range being aware of the data transfer. The data transfer process is robust and relatively immune to interference.

DESCRIPTION OF DRAWING(S) - The figure shows the schematic view of the wireless communication method.

KR 2001008279 A 1 G06F-017/00

Abstract (Basic): KR 2001008279 A

NOVELTY - A method for publishing electronic books using the internet is provided to simplify a publishing process by omitting the course to convert a manuscript written using a general word processor, as an author directly inputs and transmits a **manuscript** using an editor of **electronic** book solution on a network.

DETAILED DESCRIPTION - After accessing a sever, an author inputs his history and career for author authentication(S10). If the author summarizes and transmits the writing intention and contents of an electronic book he wants to publish(S11), the server stores them in an author database(S12). A publishing company deliberates the data stored in the author database(S13). If the publishing company **determines** to publish the electronic book, the publishing company and the author carry out digital signing(S14). The author accesses an electronic book editor connected to the server(S15) and inputs the manuscript contents using the editor(S16). The editorial staff in the publishing company adds necessary factors to the manuscript contents for the completion of the electronic book and manufactures the first finished book(S17) and requests the author to correct it(S18). The author corrects the first finished book and transmits it to the publishing company(S19). The publishing company manufactures the finally finished book(S20) and registers the book in shopping malls(S21).

Abstract (Basic): WO 200062257 A1

NOVELTY - Election information and election candidate list are displayed at a user interface, based on verification of information from user at the interface, using voter identification records in database (16). After verification, when a vote from registered voter is received, all voter identification is removed from vote and it is passed to tallying unit after the registered voter is flagged as having voted.

DETAILED DESCRIPTION - A registered voter database (16) having voter identification records for several registered voters, is accessed by a voter verification system of host computer (12) to **determine** matching of database information with information provided by user at an user interface. Based on verification, the election information including election candidates list are displayed at user interfaces (13,14) so that the user can submit his vote to host server. At the host server, all voter identification is removed from submitted vote and it is passed to tallying unit. Then, the registered voter who submitted the vote is flagged as having voted.

USE - For conducting elections through computer network having host server and several user interface.

ADVANTAGE - Provides system for conducting election at greater convenience to voters and at lower cost to administrators. It can be adapted to conduct elections for several different organizations by catering to particular needs of each organization. It is most suitably implemented using world wide web. Since the election is conducted **online**, resources required for ballot **papers** and human resources can be saved and many sources of human error can be removed.

DESCRIPTION OF DRAWING(S) - The figure shows schematic view of online election system.

Priority Applications (No Type Date): JP 85105553 A 19850517

Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
DE 3615906	A		19		

Abstract (Basic): DE 3615906 A

An optical scanning system has a reader (1) that obtains information from a document or drawing. The document has a black edging that enables document position to be identified when smaller than the full size of the scanning panel. The data is entered into memory (2) that is transmitted to a edge detector stage (3). The serial data from the memory represents points in a matrix defined by X and Y axis values.

The document points are entered into a coordinate memory (4) and coordinate processor (5) connects the boundary lines of each side. The processor controls memory read out to a cathode ray tube memory (7) for transmission to the monitor (9) with correction for the angled position of the document.

ADVANTAGE - Provides compensation for angled orientation of document.

Title Terms: OPTICAL; SCAN; SYSTEM; DOCUMENT; OUTPUT; SCAN; PROCESS; CORRECT; ANGLE; ORIENT; SCAN; SURFACE

Derwent Class: P85; T01; T04

International Patent Class (Additional): G06F-015/64 ; G06K-009/20; G09G-001/02
